eGroup Achieves Cisco Advanced Data Center Architecture Specialization – 6 Years Running

Mt. Pleasant, SC, September 1, 2016 – eGroup, the Southeast’s leading provider of data center architecture, cloud and managed services, announced today that it has achieved the Advanced Data Center Architecture Specialization from Cisco for the sixth year in a row. To fulfil the specialization, eGroup has met the program prerequisites and training requirements to sell, design, deploy and support Cisco products, technology and solutions that are under Cisco’s Data Center Architecture portfolio.

“This ongoing recognition of eGroup for the Advanced Data Center Architecture specialization emphasizes our continually increasing capability to deliver multiple data center technologies, specifically focusing on the unified compute and fabric solutions from Cisco that currently lead the data center market, but also recognizing our ability to assess and deliver sophisticated software solutions for network automation and orchestration, providing the basis for the software-defined data center,” states Mike Dent, Data Center Practice Manager for eGroup.

By achieving the specialization, eGroup has proven the ability to provide sophisticated, value-added Cisco solutions through in-depth sales capabilities, technology skills and service offerings. The specialization provides an advanced level of knowledge and skill, allowing eGroup to fully meet customers’ diverse data center needs and offers the opportunity to acquire expertise in three areas: Unified Management, Unified Fabric and Unified Computing Technologies.

“eGroup’s achievement of this for the 6th straight year, by the leading manufacturer of sophisticated data center solutions, shows our investment and success in technologies and staff

that continue to benefit our customers Data Center needs, and allows us to springboard into other specializations including Security and Hyper-Converged solutions,” Dent continued.

About eGroup

Founded in 1999, eGroup provides innovative data center architecture, cloud, and managed services to businesses across the Southeast. Recognized by INC 5000 as one of the fastest growing private companies for four consecutive years, eGroup’s solutions drive customer revenue while minimizing IT costs. With their four-phased project methodology—which encompasses consultation, design, deployment and support—eGroup prides themselves on their customer-driven approach to IT. With access to the best minds in the industry and a can-do attitude, eGroup adopts best-of-breed products, services, and technologies to support their clients’ success.

About Cisco Advanced Data Center Architecture Specialization

As part of the Cisco Channel Program, the Advanced Data Center Architecture Specialization requires partners to meet training objectives and program prerequisites in order to sell, design and deploy Cisco Data Center Solutions. The specialization offers an opportunity for partners to enhance their knowledge and skills to meet their customers’ data center demands.
