

eGroup Named to 2015 List of CRN Tech Elite 250

Annual list recognizes IT solution providers with deep technical expertise and premier certifications

Mt. Pleasant, SC, April 10, 2015 – eGroup today announced it has been named to The Channel Company's CRN® Tech Elite 250. This annual list recognizes an elite group of IT solution providers that have invested in the training and education needed to earn the most advanced technical certifications from leading vendors.

In compiling the list, The Channel Company's research group and CRN editors collaborated to assess the most customer-beneficial technical certifications in the IT channel. These technical certifications—from vendors including Cisco, Citrix, Dell, EMC, HP, IBM, NetApp, Microsoft, VMware and Symantec, among others—have enabled solution providers to deliver an outstanding level of premium products, services and support to their North American customers.

eGroup's expertise and core competence are focused in three distinct areas: Cloud & Customer Success Services, Software Services and Technical/Managed Services. To deliver these solutions, eGroup has strategic partnerships with industry leaders such as VMware, Cisco, EMC, Citrix, Microsoft, Zerto, Nutanix and PernixData, and a highly-skilled workforce trained in all of the latest developments in information technology."

"The solution providers selected for our annual Tech Elite 250 have demonstrated a commitment to excellence and gained industry credibility by investing in the IT certifications necessary to deliver exceptional service to their customers and stay competitive," said Robert Faletra, CEO, The Channel Company." These featured solution providers have enhanced and strengthened their partnerships by earning some of the most difficult certifications from some of the most prominent names in IT. We congratulate these organizations and look forward to their continued success."

"At eGroup, we see IT training and certifications as the only objective way to ensure the technical competence of our engineering professionals," said Lori Sussman, Vice President of Services. "We see certification programs as the established standard for our employees' technical education and they play an important role in developing a qualified workforce. Our clients benefit from this important benchmarking of technical skill, knowledge and capabilities."

Coverage of the Tech Elite 250 will be featured in the April issue of CRN, and online at www.CRN.com.
