## **eGroup Achieves Partnership with Nutanix Partner Network**

**Mt. Pleasant, SC, March 24, 2016** – eGroup, the Southeast’s leading provider of data center architecture, cloud, and managed services announced its recent partnership with Nutanix Partner Network. To earn the partnership, eGroup exceeded requirements for Certified Virtualization Professionals, Certified Nutanix Platform Professionals (NPP), Certified Nutanix Program Sales Engineers (NPSE) and Certified Nutanix Platform Sales (NPS) Representatives along with satisfying rigorous requirements for training and field installations.

As a recognized leader in the fast-growing, hyper-converged virtual computing platform market, Nutanix’s goal is to reinvent datacenters by differentiating organizations and providing support to its clients’ move to the cloud while reducing the challenges and risks.

Being a partner in Nutanix Partner Network, eGroup is authorized to deliver Nutanix installations providing customers with a powerful building block making datacenters more efficient, scalable and resilient. Nutanix Partner Network takes advantage of the expanding business of integrated systems and establishes companies as datacenter leaders.

“Nutanix allows a customer to accelerate their ‘internal disruption’ of technology, with consolidation of compute and storage in a simple yet effective solution, with massive scale-out possibilities,” said Mike Dent, eGroup Data Center Architecture Practice Manager.

Nutanix combines compute and storage resources into a tailored appliance that incorporates the same advanced software architecture used by leading public cloud providers – such as

Google, Facebook and Amazon. The hyper-converged infrastructure lowers power, cooling and space by 90% while making the time to value in buying, deploying and managing 8x faster.

“Nutanix is one of the few datacenter platforms that starts fast and gets faster over time while gaining smarter data awareness and more powerful integrations,” says Jirah Cox, eGroup Sales Engineer and Nutanix Technology Champion.

Nutanix’s process opens the doors to a variety of new opportunities including coming to the marketplace aligned with industry leaders, one of them being eGroup. eGroup’s partnership within Nutanix Partner Network reflects its own mission to remain customer driven in efficiently delivering applications and information to end-users. With over a decade of IT experience in delivering large scale virtualization, security, cloud and software services, eGroup is positioned well in partnering with Nutanix Partner Network.

#### **About eGroup**

Founded in 1999, eGroup provides innovative data center architecture, cloud, and managed services to businesses across the Southeast. Recognized by INC 5000 as one of the fastest growing private companies for four consecutive years, eGroup’s solutions drive customer revenue while minimizing IT costs. With their four-phased project methodology—which encompasses consultation, design, deployment and support—eGroup prides themselves on their customer-driven approach to IT. With access to the best minds in the industry and a can-do attitude, eGroup adopts best-of-breed products, services, and technologies to support their clients’ success.

#### **About Nutanix**

Nutanix provides customers with a cloud platform that converges compute and storage into a resilient, software-defined solution while reducing risks and challenges. Nutanix’s infrastructure reduces space and eliminates storage complexity enabling application mobility.
